

MARSH ST. JOHN'S-WORT

*Hypericum virginicum*

Located in coastal bogs and swamps throughout the Division.

Perennial branched or unbranched plant; 20 to 80 cm high. Leaves dark green or purplish; 2 to 7 cm long; oblong with rounded tips in pairs on stem. Flowers in small clusters near the end of branches and at upper leaf joints; flesh-color to pink; blooming in July and August. The fruit is an oblong pod; red-purple in color.

May be used as food for ducks and grouse.

*Hypericum virginicum*
